INDEX TO VOLUME 19

Part I. Subjects

Part II. Authors

Published by
The Metallurgical Society of AIME
345 East 47th Street, New York, N. Y. 10017

I. SUBJECTS

A

AIME

W. R. Hibbard, Jr., is 1967 AIME President. Feb, 1967, p. 35.
AIME Award Winners. Feb, 1967, p. 36.
AIME Annual Report—1966. March, 1967, pp. 73-84.
21st New England Regional Conference Program. April, 1967, pp. 12-13.
1967 International Vacuum Metallurgy Conference—Program. May, 1967, pp. 17-20.
EMD Bylaw Revision. July, 1967, pp. 28-29.
James Boyd Nominated 1968 AIME President-Elect. July, 1967, p. 29.
Paul Queneau Nominated 1968 TMS Vice-President. July, 1967, p. 29.
Nominations for 1968 AIME Vice-Presidents. July, 1967, pp. 30-31.
Nominations for 1968 AIME Directors. July, 1967, pp. 31-32.
Actions of the AIME Board Meeting of June 20, 1967. R. William Taylor. Aug, 1967, pp. 11 and 33.
T. P. McConnell and K. Carlson Join AIME Staff. Aug. 1967, p. 12.
AIME 1967-68 Book List. Sept, 1967, pp. 20-23.
AIME 97th Annual Meeting Program. Dec, 1967, pp. 16-21.
Plans Materialize for the AIME Annual Meeting. Dec, 1967, pp. 27, 62.

AIME ANNUAL MEETING

96th AIME Annual Meeting, Sponsored by The Metallurgical Society—Program. Jan, 1967, pp. 65-82.
1968 Annual Meeting Attendance—The Guessing Game. R. William Taylor. Oct, 1967, pp. 12, 43.
AIME 97th Annual Meeting Program. Dec, 1967, pp. 16-21.
Plans Materialize for the AIME Annual Meeting. Dec, 1967, pp. 27, 62.

ALLOYS

Crucible's System of Rapid Chemical Analysis for Metallurgical Research. T. R. Dulski and J. P. McKaveney (Crucible Steel Co. of America). April, 1967, pp. 11, 15, 81, 84.
Report on Production at SKF—Tap-to-tap time cut nearly in half. June, 1967, pp. 6-7.
René 100: A Sigma-free Turbine Blade Alloy. E. W. Ross (General Electric Co.). Dec, 1967, pp. 12-14.

ALUMINA

Potlining Failures in Aluminum Electrolysis Cells. M. B. Dell (Alcoa Research Laboratories). March, 1967, pp. 14-17.
Creep Characteristics of Selected High-Alumina Brick. J. R. Kreglo, Jr., and W. J. Smothers (Bethlehem Steel Corp.). July, 1967, pp. 20-23.
Methods for Producing Alumina from Clay—An Evaluation. F. A. Peters, R. C. Kirby, and K. B. Higbie (U.S. Bureau of Mines). Oct, 1967, pp. 26-34.
Extracting Alumina from Silicates by Melting, Quenching, and Sulfuric Acid Leaching. H. G. Iverson and H. Leitch (U.S. Bureau of Mines). Dec, 1967, pp. 28-31.

ALUMINOTHERMIC REDUCTION

Aluminum Reduction: Evaluating 5%LiF-Modified Hall Bath in 10-KA Experimental Reduction Cells. R. A. Lewis (Kaiser Aluminum and Chemical Corp.). May, 1967, pp. 30-36.

ALUMINUM

Potlining Failures in Aluminum Electrolysis Cells. M. B. Dell (Alcoa Research Laboratories). March, 1967, pp. 14-17.
Aluminum Reduction: Evaluating 5%LiF-Modified Hall Bath in 10-KA Experimental Reduction Cells. R. A. Lewis (Kaiser Aluminum and Chemical Corp.). May, 1967, pp. 30-36.
Solubility of CO_2 in Molten Salts and Its Influence on Current Efficiency in Aluminum Electrolysis. D. Bratland, K. Grjotheim, C. Krohn, and K. Motzfeldt (The Technical Univ. of Norway). Oct, 1967, pp. 13-20.

ANALYSIS

Crucible's System of Rapid Chemical Analysis for Metallurgical Research. T. R. Dulski and J. P. McKaveney (Crucible Steel Co. of America). April, 1967, pp. 11, 15, 81, 84.

B

BASIC OXYGEN STEELMAKING

Powdered or Lumpy Lime for the Basic Oxygen Furnace? P. Nilles, E. Denis, P. Dauby, and N. Bach (Centre National de Recherches Métallurgiques, Liège, Belgium). Jan, 1967, pp. 18-23.
Development of Balanced Basic Oxygen Furnace Linings. R. C. Padfield and C. R. Beechan (Bethlehem Steel Corp.). April, 1967, pp. 17-21.
Start-Up ... at Bethlehem Steel Corp. (pp. 16-17); ... at U. S. Steel Corp. (pp. 17-18); ... at Inland Steel Co. (pp. 18-19). July, 1967.

C

CONTINUOUS CASTING, STEEL

McLouth Orders Concast Units for Wide Rimmed-Steel Slabs and Induction Units for 3-Stage Heating. Staff Report. May, 1967, pp. 4-6.

COPPER

Copper Precipitation Methods at Weed Heights. H. W. Jacky (The Anaconda Co.). April, 1967, pp. 22-27.
Precipitation of Copper from Dilute Solutions Using Particulate Iron. A. E. Back (Kennecott Copper Corp.). May, 1967, pp. 27-29.
Copper and Elemental Sulphur from Chalcopyrite by Pressure Leaching. A. Vizsolyi, H. Veltman, V. N. Mackiw (Sherritt Gordon Mines, Ltd.), and I. H. Warren (Univ. of British Columbia). Nov, 1967, pp. 52-59.

D

DISPERSION STRENGETHENING

Properties and Applications of Dispersion-Strengthened Metals. S. M. Wolf (U. S. Army Materials Research Agency). June, 1967, pp. 22-28.

E

EDUCATION

1967 Senior Class in Metallurgy, Metallurgical Engineering, and Materials Science. J. P. Nielsen (New York University). Jan, 1967, pp. 27-31.
Metallurgical Education and Professional Responsibilities. J. W. Spretnak (Ohio State University). Feb, 1967, pp. 5-7.
The Metallurgical Engineering Curriculum at The University of Wisconsin. G. M. Geiger (University of Wisconsin). Feb, 1967, pp. 32-33.
Should Mining, Metallurgical, and Petroleum Curricula Be Perpetuated? R. William Taylor. July, 1967, p. 28.

ELECTRIC FURNACE CONFERENCE

Development of the Electric Arc Melting Furnace in the Past 25 Years. Samuel Arnold 3rd. Nov, 1967, pp. 28-30.

ELECTRIC FURNACE STEELMAKING

Phoenix Modernizes with Electric Arc Melting Furnaces. Nov, 1967, pp. 19-20.
Development of the Electric Arc Melting Furnace in the Past 25 Years. Samuel Arnold 3rd. Nov, 1967, pp. 28-30.
Electrical Considerations for Electrode Type. A. R. Oltrogge (GE Co.). Nov, 1967, pp. 31-35.
Phosphorus Furnace Fume Control. F. G. Rolater (Stauffer Chemical Co.). Nov, 1967, pp. 36-37.
Desulfurization Prior to the Boil. C. W. Briggs (Steel Founders' Society of America). Nov, 1967, pp. 38-42.

ETHICS

Metallurgical Education and Professional Responsibilities. J. W. Spretnak (Ohio State University). Feb, 1967, pp. 5-7.

EUTECTICS

Unidirectionally Solidified Eutectics for Optical, Electronic, and Magnetic Applications. F. S. Galasso (United Aircraft Research Laboratories). June, 1967, pp. 17-21.

H

HYDROMETALLURGY (see also Leaching)

Silo-Leaching—A New Hydro-Metallurgical Approach. W. Lodding (Rutgers University). Jan, 1967, pp. 24-26.

HYDROSTATIC FORMING

Hydrostatic Forming—A Study. S. H. Gelles (Kennecott Copper Corp.). Sept, 1967, pp. 35-46.

I

INDUCTION FURNACES

McLouth Orders Concast Units for Wide Rimmed-Steel Slabs and Induction Units for 3-Stage Heating. Staff Report. May, 1967, pp. 4-6.

J

JOURNAL OF METALS

Price List of Journal of Metals, TMS Transactions, SME Quarterly Transactions, SPE Journal Quarterly, and Transactions Volumes. Jan, 1967, p. 88.
Hurd Hutchins, Jr., appointed Editor of TMS. June, 1967, p. 33.

L

LD STEELMAKING

Continuous Thermocouple Monitoring of LD Furnace Bath Temperature. R. F. Rinesch (VÖEST, Linz/Donau, Austria). Feb, 1967, pp. 26-31.
Theoretical Possibilities of Operating the L-D Process at High Pressure. J. K. Stone (Kaiser Engineers). May, 1967, pp. 21-26.
L-D Steelmaking at Mid-1967. J. K. Stone (Kaiser Engineers). July, 1967, pp. 10-11, 36.

LEACHING (see also Hydrometallurgy)

Silo-Leaching—A New Hydro-Metallurgical Approach. W. Lodding (Rutgers University). Jan, 1967, pp. 24-26.
Direct Acid Pressure Leaching of Chalcocite Concentrate. H. Veltman, S. Pellegrini, and V. N. Mackiw (Sherritt Gordon Mines, Ltd., Ft. Saskatchewan, Alta., Canada). Feb, 1967, pp. 21-25.
Copper Precipitation Methods at Weed Heights. H. W. Jacky (The Anaconda Co.). April, 1967, pp. 22-27.
The Place of the Imperial Smelting Process in Nonferrous Metallurgy. S. W. K. Morgan and D. A. Temple (Imperial Smelting Processes Ltd.). Aug, 1967, pp. 23-29.
Copper and Elemental Sulphur from Chalcopyrite by Pressure Leaching. A. Vizsolyi, H. Veltman, V. N. Mackiw (Sherritt Gordon Mines, Ltd.), and I. H. Warren (Univ. of British Columbia). Nov, 1967, pp. 52-59.
Extracting Alumina from Silicates by Melting, Quenching, and Sulfuric Acid Leaching. H. G. Iverson and H. Leitch (U.S. Bureau of Mines). Dec, 1967, pp. 28-31.

M

MANAGEMENT

Your Turn to Run the Meeting? Reprinted from *Changing Times*, the Kiplinger Magazine. Dec, 1967, pp. 6-7.

MANGANESE

Manganese Recovery as Chloride from Ores and Slag. A. A. Cochran and W. L. Falke (U. S. Bureau of Mines). April, 1967, pp. 28-32.

MARAGING

Developments and Projected Trends in Maraging Steels. R. F. Decker, C. J. Novak, and T. W. Landig (International Nickel Co.). Nov, 1967, pp. 60-66.

MATERIALS

Materials in Vacuum Environment. Summarized by D. T. Bourgette (Oak Ridge National Laboratory). Dec. 1967, pp. 50-58.

METALLURGY

Metallurgy in the Semiconductor Industry. R. O. Grubel (General Electric Co.). Jan, 1967, pp. 13-17.
The Metallurgical Engineering Curriculum at The University of Wisconsin. G. M. Geiger (University of Wisconsin). Feb, 1967, pp. 32-33.
Vacuum Metallurgy 1967. R. F. Bunshah (Lawrence Radiation Lab., U. of Calif.), M. A. Orehoski (U.S. Steel Corp.), A. Simkovich (Latrobe Steel Co.), R. K. Pitler (Allegheny-Ludlum Steel Corp.), J. Morley (industrial consultant), D. Bourgette (Oak Ridge National Lab.), and S. Nelson (Battelle Memorial Institute). Part 1—Oct, 1967, pp. 35-39; Part 2—Nov, 1967, pp. 69-75.

METALLURGICAL SOCIETY, THE

96th AIME Annual Meeting, Sponsored by The Metallurgical Society—Program. Jan, 1967, pp. 65-82.
J. H. Jackson is 1967 TMS President. Feb, 1967, p. 35.
TMS Award Winners. Feb, 1967, pp. 35-36.
Five Honored as Fellows by TMS. Feb, 1967, p. 36.
50th National Open Hearth and Basic Oxygen Steel Conference—Program. March, 1967, pp. 25-34.
The Directors for 1967/68 of The Metallurgical Society. March, 1967, p. 37.
21st New England Regional Conference Program. April, 1967, pp. 12-13.
1967 International Vacuum Metallurgy Conference—Program. May, 1967, pp. 17-20.
1967 Fall Meeting—Hotels, Registration Forms. June, 1967, pp. 12-13.
Conference on Chemical Vapor Deposition of Refractory Metals, Alloys, and Compounds—Program and Preregistration Form. June, 1967, pp. 17-20.
Hurd Hutchins, Jr., appointed Editor of TMS. June, 1967, p. 33.
EMD Bylaw Revision. July, 1967, pp. 28-29.
James Boyd Nominated 1968 AIME President-Elect. July, 1967, p. 29.
Paul Queneau Nominated 1968 TMS Vice-President. July, 1967, p. 29.
1968 TMS Divisional Officers Nominated. July, 1967, p. 32.
1966 Herty Award Winners. June, 1967, p. 33; July, 1967, p. 36.
TMS 1967 Nuclear Metallurgy Symposium Program. Aug. 1967, pp. 7-9.
TMS Operating Metallurgy Conference and Technical Information Exchange Preliminary Program. Sept. 1967, pp. 17-19.
TMS New England Regional Conference Review: The Failure of Engineering Materials. Summarized by S. H. Moll (Advanced Metals Research Corp.). Oct, 1967, pp. 22-25.

MINERAL RESOURCES

Minerals—Keystone to the World's Economy. Walter F. Hibbard, Jr. Sept, 1967, pp. 14 and 49.

O

OPEN-HEARTH STEELMAKING

Soviet Double-Furnace Open Hearth Process. A. Vasilivitsky (Novosti Press Agency). April, 1967, pp. 4, 84.

OPERATING METALLURGY CONFERENCE

TMS Operating Metallurgy Conference and Technical Information Exchange Preliminary Program. Sept. 1967, pp. 17-19.
1967 Operating Metallurgy Conference and Technical Information Exchange Program. Oct, 1967, pp. 49-76.

P

PICKLING

Factors Influencing the Pickling Time Required for Hot-Rolled Steel Strip. R. M. Hudson, C. J. Warning (U. S. Steel Corp.), and D. W. Brown (University of Pittsburgh). March, 1967, pp. 9-13.

POWDER METALLURGY

New Techniques for Indexing X-ray Powder Patterns of Unknown Structures. J. B. Goebel and A. S. Wilson (Battelle Memorial Institute). May, 1967, pp. 10-11, 39.
Powder Metallurgy Research—Contemporary Trends. J. S. Hirschhorn (Univ. of Wisc.). Sept, 1967, pp. 25-30.

R

RARE EARTH METALS

A Process for Direct Chlorination of Rare Earth Ores at High Temperatures on a Production Scale. W. Brugger and E. Greinacher (Th. Goldschmidt A.G.). Dec, 1967, pp. 32-35.

REFRACTORIES

Load Bearing Characteristics of Ceramic Refractories. T. D. McGee (Iowa State Univ.). Dec, 1967, pp. 22-26.

REFRACTORY METALS

Aerospace Applications of Refractory Metals. R. I. Jaffee (Battelle Memorial Institute). Feb, 1967, pp. 17-20.
Creep Characteristics of Selected High-Alumina Brick. J. R. Kreglo, Jr., and W. J. Smothers (Bethlehem Steel Corp.). July, 1967, pp. 20-23.

RESEARCH

An Evaluation: The Challenge of Change. H. B. Emerick (Jones & Laughlin Steel Corp.). Feb, 1967, pp. 12-16.
Crucible's System of Rapid Chemical Analysis for Metallurgical Research. T. R. Dulski and J. P. McKaveney (Crucible Steel Co. of America). April, 1967, pp. 11, 15, 81, 84.

S

SENIOR CLASS

1967 Senior Class in Metallurgy, Metallurgical Engineering, and Materials Science. J. P. Nielsen (New York University). Jan. 1967, pp. 27-31.

SPACE VEHICLE SYSTEMS

Aerospace Applications of Refractory Metals. R. I. Jaffee (Battelle Memorial Institute). Feb, 1967, pp. 17-20.
Progress in Superalloys for SST Jet Engines. W. J. Boesch, R. S. Cremisio (Special Metals Corp.), and F. M. Richmond (Universal-Cyclops Specialty Steel Div., Cyclops Corp.). June, 1967, pp. 8-10.

STEEL

Inclusion Counting of Steel Residues as Means of Assessing the Hot Working Performance of Steel. W. M. Wojcik, R. M. Raybeck, and E. J. Paliwoda (Jones & Laughlin Steel Corp.). Dec, 1967, pp. 36-40.

STEEL, ROLLING OF

Factors Influencing the Pickling Time Required for Hot-Rolled Steel Strip. R. M. Hudson, C. J. Warning (U. S. Steel Corp.), and D. W. Brown (University of Pittsburgh). March, 1967, pp. 9-13.
Manitoba Rolling Mills Opens $9-Million Steel Production Facility. Aug. 1967, pp. 4-5.
Status of Contact-Bend-Stretch Rolling. L. F. Coffin, Jr. (General Electric Co.) Aug. 1967, pp. 14-22.

STEELMAKING (see also Open-Hearth Steelmaking, Basic Oxygen Steelmaking, Kaldo Steelmaking, and Electric-Furnace Steelmaking)

Vacuum Induction Melting: the Revolutionary Influence in Steelmaking. F. N. Darmara (Special Metals Corp.). Dec, 1967, pp. 42-48.

STEEL, MARAGING

Report on Production at SKF—Tap-to-tap time cut nearly in half. June, 1967, pp. 6-7.
Manitoba Rolling Mills Opens $9-Million Steel Production Facility. Aug. 1967, pp. 4-5.

STEEL, RESULFURIZED

The Effect of Oxygen in Resulfurized Steels. R. B. G. Yeo (U. S. Steel Corp.). June, 1967, pp. 29-32—Part I; July, 1967, pp. 25-27—Part II.

SULFURIC ACID

Direct Acid Pressure Leaching of Chalcocite Concentrate. H. Veltman, S. Pellegrini, and V. N. Mackiw (Sherritt Gordon Mines, Ltd., Ft. Saskatchewan, Alta., Canada). Feb, 1967, pp. 21-25.
Sulfuric Acid Production from Ore Roaster Gases. J. R. Donovan and P. J. Stuber (Monsanto Co.). Nov, 1967, pp. 45-50.

SUPERALLOYS

Progress in Superalloys for SST Jet Engines. W. J. Boesch, R. S. Cremisio (Special Metals Corp.), and F. M. Richmond (Universal-Cyclops Specialty Steel Div., Cyclops Corp.). June, 1967, pp. 8-10.

T

TANTALUM

Zirconium Diboride Coatings on Tantalum. J. E. Eorgan and N. D. Fern (Kawecki Chemical Co.). Sept. 1967, pp. 6-7, 10-11.

TESTING, NON-DESTRUCTIVE

Continuous Thermocouple Monitoring of LD Furnace Bath Temperature. R. F. Rinesch (VÖEST, Linz/Donau, Austria). Feb, 1967, pp. 26-31.

THERMODYNAMICS

Problems and Progress in the Thermodynamics of Metals and Alloys. R. Hultgren (Univ. of Calif., Berkeley). Sept, 1967, pp. 31-34.

TITANIUM

High-Purity Titanium Electrowon from Titanium Tetrachloride. O. Q. Leone, H. Knudsen, and D. Couch (U. S. Bureau of Mines). March, 1967, pp. 18-23.

U

USSR

Soviet Double-Furnace Open Hearth Process. A. Vasilivitsky (Novosti Press Agency). April, 1967, pp. 4, 84.

V

VACUUM MELTING

Vacuum Induction Melting: tae Revolutionary Influence in Steelmaking. F. N. Darmara (Special Metals Corp.). Dec, 1967, pp. 42-48.

X

X-RAY DIFFRACTION

New Techniques for Indexing X-ray Powder Patterns of Unknown Structures. J. B. Goebel and A. S. Wilson (Battelle Memorial Institute). May, 1967, pp. 10-11, 39.

Z

ZINC

Zinc Dust in Europe—Its manufacture, properties, and uses. D. S. Newton and L. J. Derham (Imperial Smelting Corp. Alloys, Ltd.). Oct, 1967, pp. 6, 8, 9.

ZINC SMELTING

The Place of the Imperial Smelting Process in Nonferrous Metallurgy. S. W. K. Morgan and D. A. Temple (Imperial Smelting Processes Ltd.). Aug, 1967, pp. 23-29.

II. AUTHORS

A

ARNOLD, Samuel 3rd
Development of the Electric Arc Melting Furnace in the Past 25 Years. Samuel Arnold 3rd. Nov, 1967, pp. 28-30.

B

BACH, N.
Powdered or Lumpy Lime for the Basic Oxygen Furnace? P. Nilles, E. Denis, P. Dauby, and N. Bach (Centre National de Recherches Métallurgiques, Liège, Belgium). Jan, 1967, pp. 18-23.

BACK, A. E.
Precipitation of Copper from Dilute Solutions Using Particulate Iron. A. E. Back (Kennecott Copper Corp.). May, 1967, pp. 27-29.

BEECHAM, C. R.
Development of Balanced Basic Oxygen Furnace Linings. R. C. Padfield and C. R. Beechan (Bethlehem Steel Corp.). April, 1967, pp. 17-21.

BOESCH, W. J.
Progress in Superalloys for SST Jet Engines. W. J. Boesch, R. S. Cremisio (Special Metals Corp.), and F. M. Richmond (Universal-Cyclops Specialty Steel Div., Cyclops Corp.). June, 1967, pp. 8-10.

BOURGETTE, D. T.
Vacuum Metallurgy 1967. R. F. Bunshah (Lawrence Radiation Lab., U. of Calif.), M. A. Orehoski (U.S. Steel Corp.), A. Simkovich (Latrobe Steel Co.), R. K. Pitler (Allegheny-Ludlum Steel Corp.), J. Morley (industrial consultant), D. Bourgette (Oak Ridge National Lab.), and S. Nelson (Battelle Memorial Institute). Part 1—Oct, 1967, pp. 35-39; Part 2—Nov, 1967, pp. 69-75.
Materials in Vacuum Environment. Summarized by D. T. Bourgette (Oak Ridge National Laboratory). Dec, 1967, pp. 50-58.

BRATLAND, D.
Solubility of CO_2 in Molten Salts and Its Influence on Current Efficiency in Aluminum Electrolysis. D. Bratland, K. Grjotheim, C. Krohn, and K. Motzfeldt (The Technical Univ. of Norway). Oct, 1967, pp. 13-20.

BRIGGS, C. W.
Desulfurization Prior to the Boil. C. W. Briggs (Steel Founders' Society of America). Nov, 1967, pp. 38-42.

BROWN, D. W.
Factors Influencing the Pickling Time Required for Hot-Rolled Steel Strip. R. M. Hudson, C. J. Warning (U. S. Steel Corp.), and D. W. Brown (University of Pittsburgh). March, 1967, pp. 9-13.

BRUGGER, W.
A Process for Direct Chlorination of Rare Earth Ores at High Temperatures on a Production Scale. W. Brugger and E. Greinacher (Th. Goldschmidt A.G.). Dec, 1967, pp. 32-35.

BUNSHAH, R. F.
Vacuum Metallurgy 1967. R. F. Bunshah (Lawrence Radiation Lab., U. of Calif.), M. A. Orehoski (U.S. Steel Corp.), A. Simkovich (Latrobe Steel Co.), R. K. Pitler (Allegheny-Ludlum Steel Corp.), J. Morley (industrial consultant), D. Bourgette (Oak Ridge National Lab.), and S. Nelson (Battelle Memorial Institute). Part 1—Oct, 1967, pp. 35-39; Part 2—Nov, 1967, pp. 69-75.

C

COCHRAN, A. A.
Manganese Recovery as Chloride from Ores and Slag. A. A. Cochran and W. L. Falke (U. S. Bureau of Mines). April, 1967, pp. 28-32.

COFFIN, L. F., Jr.
Status of Contact-Bend-Stretch Rolling. L. F. Coffin, Jr. (General Electric Co.) Aug, 1967, pp. 14-22.

COUCH, D.
High-Purity Titanium Electrowon from Titanium Tetrachloride. O. Q. Leone, H. Knudsen, and D. Couch (U. S. Bureau of Mines). March, 1967, pp. 18-23.

CREMISIO, R. S.
Progress in Superalloys for SST Jet Engines. W. J. Boesch, R. S. Cremisio (Special Metals Corp.), and F. M. Richmond (Universal-Cyclops Specialty Steel Div., Cyclops Corp.). June, 1967, pp. 8-10.

D

DARMARA, F. N.
Vacuum Induction Melting: the Revolutionary Influence in Steelmaking. F. N. Darmara (Special Metals Corp.). Dec, 1967, pp. 42-48.

DAUBY, P.
Powdered or Lumpy Lime for the Basic Oxygen Furnace? P. Nilles, E. Denis, P. Dauby, and N. Bach (Centre National de Recherches Métallurgiques, Liège, Belgium). Jan, 1967, pp. 18-23.

DECKER, R. F.
Developments and Projected Trends in Maraging Steels. R. F. Decker, C. J. Novak, and T. W. Landig (International Nickel Co.). Nov, 1967, pp. 60-66.

DELL, M. B.
Potlining Failures in Aluminum Electrolysis Cells. M. B. Dell (Alcoa Research Laboratories). March, 1967, pp. 14-17.

DENIS, E.
Powdered or Lumpy Lime for the Basic Oxygen Furnace? P. Nilles, E. Denis, P. Dauby, and N. Bach (Centre National de Recherches Métallurgiques, Liège, Belgium). Jan, 1967, pp. 18-23.

DERHAM, L. J.
Zinc Dust in Europe—Its manufacture, properties, and uses. D. S. Newton and L. J. Derham (Imperial Smelting Corp. Alloys, Ltd.). Oct, 1967, pp. 6, 8, 9.

DONOVAN, J. R.
Sulfuric Acid Production from Ore Roaster Gases. J. R. Donovan and P. J. Stuber (Monsanto Co.). Nov, 1967, pp. 45-50.

DULSKI, T. R.
Crucible's System of Rapid Chemical Analysis for Metallurgical Research. T. R. Dulski and J. P. McKaveney (Crucible Steel Co. of America). April, 1967, pp. 11, 15, 81, 84.

E

EMERICK, H. B.
An Evaluation: The Challenge of Change. H. B. Emerick (Jones & Laughlin Steel Corp.). Feb, 1967, pp. 12-16.

EORGAN, J. E.
Zirconium Diboride Coatings on Tantalum. J. E. Eorgan and N. D. Fern (Kawecki Chemical Co.). Sept, 1967, pp. 6-7, 10-11.

F

FALKE, W. L.
Manganese Recovery as Chloride from Ores and Slag. A. A. Cochran and W. L. Falke (U. S. Bureau of Mines). April, 1967, pp. 28-32.

FERN, N. D.
Zirconium Diboride Coatings on Tantalum. J. E. Eorgan and N. D. Fern (Kawecki Chemical Co.). Sept, 1967, pp. 6-7, 10-11.

G

GALASSO, F. S.
Unidirectionally Solidified Eutectics for Optical, Electronic, and Magnetic Applications. F. S. Galasso (United Aircraft Research Laboratories). June, 1967, pp. 17-21.

GEIGER, G. M.
The Metallurgical Engineering Curriculum at The University of Wisconsin. G. M. Geiger (University of Wisconsin). Feb, 1967, pp. 32-33.

GELLES, S. H.
Hydrostatic Forming—A Study. S. H. Gelles (Kennecott Copper Corp.). Sept, 1967, pp. 35-46.

GOEBEL, J. B.
New Techniques for Indexing X-ray Powder Patterns of Unknown Structures. J. B. Goebel and A. S. Wilson (Battelle Memorial Institute). May, 1967, pp. 10-11, 39.

GREINACHER, E.
A Process for Direct Chlorination of Rare Earth Ores at High Temperatures on a Production Scale. W. Brugger and E. Greinacher (Th. Goldschmidt A.G.). Dec, 1967, pp. 32-35.

GRJOTHEIM, K.
Solubility of CO_2 in Molten Salts and Its Influence on Current Efficiency in Aluminum Electrolysis. D. Bratland, K. Grjotheim, C. Krohn, and K. Motzfeldt (The Technical Univ. of Norway). Oct, 1967, pp. 13-20.

GRUBEL, R. O.
Metallurgy in the Semiconductor Industry. R. O. Grubel (General Electric Co.). Jan, 1967, pp. 13-17.

H

HIBBARD, Walter F., Jr.
Minerals—Keystone to the World's Economy. Walter F. Hibbard, Jr. Sept, 1967, pp. 14 and 49.

HIGBIE, K. B.
Methods for Producing Alumina from Clay—An Evaluation. F. A. Peters, R. C. Kirby, and K. B. Higbie (U.S. Bureau of Mines). Oct, 1967, pp. 26-34.

HIRSCHHORN, J. S.
Powder Metallurgy Research—Contemporary Trends. J. S. Hirschhorn (Univ. of Wisc.). Sept, 1967, pp. 25-30.

HUDSON, R. M.
Factors Influencing the Pickling Time Required for Hot-Rolled Steel Strip. R. M. Hudson, C. J. Warning (U. S. Steel Corp.), and D. W. Brown (University of Pittsburgh). March, 1967, pp. 9-13.

HULTGREN, R.
Problems and Progress in the Thermodynamics of Metals and Alloys. R. Hultgren (Univ. of Calif., Berkeley). Sept, 1967, pp. 31-34.

I

IVERSON, H. G.
Extracting Alumina from Silicates by Melting, Quenching, and Sulfuric Acid Leaching. H. G. Iverson and H. Leitch (U.S. Bureau of Mines). Dec, 1967, pp. 28-31.

J

JACKY, H. W.
Copper Precipitation Methods at Weed Heights. H. W. Jacky (The Anaconda Co.). April, 1967, pp. 22-27.

JAFFEE, R. I.
Aerospace Applications of Refractory Metals. R. I. Jaffee (Battelle Memorial Institute). Feb, 1967, pp. 17-20.

K

KIRBY, R. C.
Methods for Producing Alumina from Clay—An Evaluation. F. A. Peters, R. C. Kirby, and K. B. Higbie (U.S. Bureau of Mines). Oct, 1967, pp. 26-34.

KNUDSEN, H.
High-Purity Titanium Electrowon from Titanium Tetrachloride. O. Q. Leone, H. Knudsen, and D. Couch (U. S. Bureau of Mines). March, 1967, pp. 18-23.

KREGLO, J. R., Jr.
Creep Characteristics of Selected High-Alumina Brick. J. R. Kreglo, Jr., and W. J. Smothers (Bethlehem Steel Corp.). July, 1967, pp. 20-23.

KROHN, C.
Solubility of CO_2 in Molten Salts and Its Influence on Current Efficiency in Aluminum Electrolysis. D. Bratland, K. Grjotheim, C. Krohn, and K. Motzfeldt (The Technical Univ. of Norway). Oct, 1967, pp. 13-20.

L

LANDIG, T. W.
Developments and Projected Trends in Maraging Steels. R. F. Decker, C. J. Novak, and T. W. Landig (International Nickel Co.). Nov, 1967, pp. 60-66.

LEITCH, H.
Extracting Alumina from Silicates by Melting, Quenching, and Sulfuric Acid Leaching. H. G. Iverson and H. Leitch (U.S. Bureau of Mines). Dec, 1967, pp. 28-31.

LEONE, O. Q.
High-Purity Titanium Electrowon from Titanium Tetrachloride. O. Q. Leone, H. Knudsen, and D. Couch (U. S. Bureau of Mines). March, 1967, pp. 18-23.

LEWIS, R. A.
Aluminum Reduction: Evaluating 5% LiF-Modified Hall Bath in 10-KA Experimental Reduction Cells. R. A. Lewis (Kaiser Aluminum and Chemical Corp.). May, 1967, pp. 30-36.

LODDING, W.
Silo-Leaching—A New Hydro-Metallurgical Approach. W. Lodding (Rutgers University). Jan, 1967, pp. 24-26.

M

MACKIW, V. N.
Direct Acid Pressure Leaching of Chalcocite Concentrate. H. Veltman, S. Pellegrini, and V. N. Mackiw (Sherritt Gordon Mines, Ltd., Ft. Saskatchewan, Alta., Canada). Feb, 1967, pp. 21-25.
Copper and Elemental Sulphur from Chalcopyrite by Pressure Leaching. A. Vizsolyi, H. Veltman, V. N. Mackiw (Sherritt Gordon Mines, Ltd.), and I. H. Warren (Univ. of British Columbia). Nov, 1967, pp. 52-59.

McGEE, T. D.
Load Bearing Characteristics of Ceramic Refractories. T. D. McGee (Iowa State Univ.). Dec, 1967, pp. 22-26.

McKAVENEY, J. P.
Crucible's System of Rapid Chemical Analysis for Metallurgical Research. T. R. Dulski and J. P. McKaveney (Crucible Steel Co. of America). April, 1967, pp. 11, 15, 81, 84.

MORGAN, S. W. K.
The Place of the Imperial Smelting Process in Nonferrous Metallurgy. S. W. K. Morgan and D. A. Temple (Imperial Smelting Processes Ltd.). Aug, 1967, pp. 23-29.

MORLEY, J.
Vacuum Metallurgy 1967. R. F. Bunshah (Lawrence Radiation Lab., U. of Calif.), M. A. Orehoski (U.S. Steel Corp.), A. Simkovich (Latrobe Steel Co.), R. K. Pitler (Allegheny-Ludlum Steel Corp.), J. Morley (industrial consultant), D. Bourgette (Oak Ridge National Lab.), and S. Nelson (Battelle Memorial Institute). Part 1—Oct, 1967, pp. 35-39; Part 2—Nov, 1967, pp. 69-75.

MOLL, S. H.
TMS New England Regional Conference Review: The Failure of Engineering Materials. Summarized by S. H. Moll (Advanced Metals Research Corp.). Oct, 1967, pp. 22-25.

MOTZFELDT, K.
Solubility of CO_2 in Molten Salts and Its Influence on Current Efficiency in Aluminum Electrolysis. D. Bratland, K. Grjotheim, C. Krohn, and K. Motzfeldt (The Technical Univ. of Norway). Oct, 1967, pp. 13-20.

N

NELSON, S.
Vacuum Metallurgy 1967. R. F. Bunshah (Lawrence Radiation Lab., U. of Calif.), M. A. Orehoski (U.S. Steel Corp.), A. Simkovich (Latrobe Steel Co.), R. K. Pitler (Allegheny-Ludlum Steel Corp.), J. Morley (industrial consultant), D. Bourgette (Oak Ridge National Lab.), and S. Nelson (Battelle Memorial Institute). Part 1—Oct, 1967, pp. 35-39; Part 2—Nov, 1967, pp. 69-75.

NEWTON, D. S.
Zinc Dust in Europe—Its manufacture, properties, and uses. D. S. Newton and L. J. Derham (Imperial Smelting Corp. Alloys, Ltd.). Oct, 1967, pp. 6, 8, 9.

NIELSEN, J. P.
1967 Senior Class in Metallurgy, Metallurgical Engineering, and Materials Science. J. P. Nielsen (New York University). Jan, 1967, pp. 27-31.

NILLES, P.
Powdered or Lumpy Lime for the Basic Oxygen Furnace? P. Nilles, E. Denis, P. Dauby, and N. Bach (Centre National de Recherches Métallurgiques, Liège, Belgium). Jan, 1967, pp. 18-23.

NOVAK, C. J.
Developments and Projected Trends in Maraging Steels. R. F. Decker, C. J. Novak, and T. W. Landig (International Nickel Co.). Nov, 1967, pp. 60-66.

O

OLTROGGE, A. R.
Electrical Considerations for Electrode Type. A. R. Oltrogge (GE Co.). Nov, 1967, pp. 31-35.

OREHOSKI, M. A.
Vacuum Metallurgy 1967. R. F. Bunshah (Lawrence Radiation Lab., U. of Calif.), M. A. Orehoski (U.S. Steel Corp.), A. Simkovich (Latrobe Steel Co.), R. K. Pitler (Allegheny-Ludlum Steel Corp.), J. Morley (industrial consultant), D. Bourgette (Oak Ridge National Lab.), and S. Nelson (Battelle Memorial Institute). Part 1—Oct, 1967, pp. 35-39; Part 2—Nov, 1967, pp. 69-75.

P

PADFIELD, R. C.
Development of Balanced Basic Oxygen Furnace Linings. R. C. Padfield and C. R. Beechan (Bethlehem Steel Corp.). April, 1967, pp. 17-21.

PALIWODA, E. J.
Inclusion Counting of Steel Residues as Means of Assessing the Hot Working Performance of Steel. W. M. Wojcik, R. M. Raybeck, and E. J. Paliwoda (Jones & Laughlin Steel Corp.). Dec, 1967, pp. 36-40.

PELLEGRINI, S.
Direct Acid Pressure Leaching of Chalcocite Concentrate. H. Veltman, S. Pellegrini, and V. N. Mackiw (Sherritt Gordon Mines, Ltd., Ft. Saskatchewan, Alta., Canada). Feb, 1967, pp. 21-25.

PETERS, F. A.
Methods for Producing Alumina from Clay—An Evaluation. F. A. Peters, R. C. Kirby, and K. B. Higbie (U.S. Bureau of Mines). Oct, 1967, pp. 26-34.

PITLER, R. K.
Vacuum Metallurgy 1967. R. F. Bunshah (Lawrence Radiation Lab., U. of Calif.), M. A. Orehoski (U.S. Steel Corp.), A. Simkovich (Latrobe Steel Co.), R. K. Pitler (Allegheny-Ludlum Steel Corp.), J. Morley (industrial consultant), D. Bourgette (Oak Ridge National Lab.), and S. Nelson (Battelle Memorial Institute). Part 1—Oct, 1967, pp. 35-39; Part 2—Nov, 1967, pp. 69-75.

R

RAYBECK, R. M.
Inclusion Counting of Steel Residues as Means of Assessing the Hot Working Performance of Steel. W. M. Wojcik, R. M. Raybeck, and E. J. Paliwoda (Jones & Laughlin Steel Corp.). Dec, 1967, pp. 36-40.

RICHMOND, F. M.
Progress in Superalloys for SST Jet Engines. W. J. Boesch, R. S. Cremisio (Special Metals Corp.), and F. M. Richmond (Universal-Cyclops Specialty Steel Div., Cyclops Corp.). June, 1967, pp. 8-10.

RINESCH, R. F.
Continuous Thermocouple Monitoring of LD Furnace Bath Temperature. R. F. Rinesch (VÖEST, Linz/Donau, Austria). Feb, 1967, pp. 26-31.

ROLATOR, F. G.
Phosphorus Furnace Fume Control. F. G. Rolater (Stauffer Chemical Co.). Nov, 1967, pp. 36-37.

ROSS, E. W.
René 100: A Sigma-free Turbine Blade Alloy. E. W. Ross (General Electric Co.). Dec, 1967, pp. 12-14.

S

SIMKOVICH, A.
Vacuum Metallurgy 1967. R. F. Bunshah (Lawrence Radiation Lab., U. of Calif.), M. A. Orehoski (U.S. Steel Corp.), A. Simkovich (Latrobe Steel Co.), R. K. Pitler (Allegheny-Ludlum Steel Corp.), J. Morley (industrial consultant), D. Bourgette (Oak Ridge National Lab.), and S. Nelson (Battelle Memorial Institute). Part 1—Oct, 1967, pp. 35-39; Part 2—Nov, 1967, pp. 69-75.

SMOTHERS, W. J.
Creep Characteristics of Selected High-Alumina Brick. J. R. Kreglo, Jr., and W. J. Smothers (Bethlehem Steel Corp.). July, 1967, pp. 20-23.

SPRETNAK, J. W.
Metallurgical Education and Professional Responsibilities. J. W. Spretnak (Ohio State University). Feb, 1967, pp. 5-7.

STONE, J. K.
Theoretical Possibilities of Operating the L-D Process at High Pressure. J. K. Stone (Kaiser Engineers). May, 1967, pp. 21-26.
L-D Steelmaking at Mid-1967. J. K. Stone (Kaiser Engineers). July, 1967, pp. 10-11, 36.

STUBER, P. J.
Sulfuric Acid Production from Ore Roaster Gases. J. R. Donovan and P. J. Stuber (Monsanto Co.). Nov, 1967, pp. 45-50.

T

TAYLOR, R. William
Meet Mike Crowley, an Economist. R. W. Taylor (AIME). Jan, 1967, p. 32.
Should Mining, Metallurgical, and Petroleum Curricula Be Perpetuated? R. William Taylor. July, 1967, p. 28.
Actions of the AIME Board Meeting of June 20, 1967. R. William Taylor. Aug, 1967, pp. 11 and 33.
1968 Annual Meeting Attendance—The Guessing Game. R. William Taylor. Oct, 1967, pp. 12, 43.
Manpower Problems in the Mineral Industries. R. William Taylor. Nov, 1967, p. 8.

TEMPLE, D. A.
The Place of the Imperial Smelting Process in Nonferrous Metallurgy. S. W. K. Morgan and D. A. Temple (Imperial Smelting Processes Ltd.). Aug, 1967, pp. 23-29.

V

VASILIVITSKY, A.
Soviet Double-Furnace Open Hearth Process. A. Vasilivitsky (Novosti Press Agency). April, 1967, pp. 4, 84.

VELTMAN, H.
Direct Acid Pressure Leaching of Chalcocite Concentrate. H. Veltman, S. Pellegrini, and V. N. Mackiw (Sherritt Gordon Mines, Ltd., Ft. Saskatchewan, Alta., Canada). Feb, 1967, pp. 21-25.
Copper and Elemental Sulphur from Chalcopyrite by Pressure Leaching. A. Vizsolyi, H. Veltman, V. N. Mackiw (Sherritt Gordon Mines, Ltd.), and I. H. Warren (Univ. of British Columbia). Nov, 1967, pp. 52-59.

VIZSOLYI, A.
Copper and Elemental Sulphur from Chalcopyrite by Pressure Leaching. A. Vizsolyi, H. Veltman, V. N. Mackiw (Sherritt Gordon Mines, Ltd.), and I. H. Warren (Univ. of British Columbia). Nov, 1967, pp. 52-59.

W

WARNUNG, C. J.
Factors Influencing the Pickling Time Required for Hot-Rolled Steel Strip. R. M. Hudson, C. J. Warning (U. S. Steel Corp.), and D. W. Brown (University of Pittsburgh). March, 1967, pp. 9-13.

WILSON, A. S.
New Techniques for Indexing X-ray Powder Patterns of Unknown Structures. J. B. Goebel and A. S. Wilson (Battelle Memorial Institute). May, 1967, pp. 10-11, 39.

WOJCIK, W. M.
Inclusion Counting of Steel Residues as Means of Assessing the Hot Working Performance of Steel. W. M. Wojcik, R. M. Raybeck, and E. J. Paliwoda (Jones & Laughlin Steel Corp.). Dec, 1967, pp. 36-40.

WOLF, S. M.
Properties and Applications of Dispersion-Strengthened Metals. S. M. Wolf (U. S. Army Materials Research Agency). June, 1967, pp. 22-28.
